- **Design Tools**: Figma, Photopea, Canva
- **Version Control**: GitHub
- **Development Toolkits**: JetBrains Toolbox

PROJECT

1. **College Name**: Dr. M.G.R. Education and Research Institute | **Dec 2023 – Mar 2024**
   Project Title: Hand Gesture Controlled Virtual Mouse

Project Description:

- Developed a system enabling users to control a virtual mouse using hand gestures.

- Utilized a camera to detect hand movements and translate them into standard mouse actions, including clicking, dragging, and scrolling.
- Designed the graphical user interface (GUI) using Python's Tkinter library, integrating intuitive controls such as buttons, labels, and popup boxes.
- Implemented popup boxes to display messages, collect user input, and show alerts within the application.

Software: PyCharm Community
Languages Used: Python

2. Project Title: Personal Portfolio Website

Project Description:

- Designed and developed a personal portfolio website using HTML, CSS, and JavaScript in Visual Studio Code. The website includes sections like About Me, Skills, Projects, and Contact, with a responsive layout optimized for desktop and mobile devices. The project highlights clean UI/UX design, semantic HTML, and modular CSS.

Software: Visual Studio Code
Languages Used: HTML, CSS, JavaScript & Bootstrap
